

Domain Glossary

Internal acronym + jargon reference for the demo (links terms to schema and SOPs).

Legal Glossary

SOL: Statute of limitations. The legal deadline by which a case must be filed. In our system, SOL deadlines are tracked in the filings table as `filing_type` = 'Statute Filing Reminder', with the deadline in the `due_date` column. Personal-injury claims in Illinois generally have a 2-year SOL per 735 ILCS 5/13-202.

PI: Personal injury. Legal practice area covering bodily injury claims, including motor vehicle accidents, slip-and-fall, and premises liability. Clients with `matter_type` = 'personal_injury' in the clients table.

UM/UIM: Uninsured / underinsured motorist coverage. Applies when the at-fault party lacks adequate insurance.

Demand package: Settlement-demand letter sent to the carrier with a statement of facts, liability analysis, medical chronology, bills, and the demand figure.

MMI: Maximum medical improvement. The point at which a client's condition has stabilized. Demand packages are typically sent after MMI.

ARDC: Attorney Registration and Disciplinary Commission (Illinois). Sets case-file retention requirements -- typically 7 years from closure for matters involving trust funds.

Custody violation: An alleged breach of a custody agreement (e.g., overnight travel without consent, missed exchange). Documented in case notes for the related divorce client.

Alimony: Spousal support payments. Tracked in `alimony_payments` with status 'paid', 'late', or 'missed'.

Healthcare / SNF Glossary

SNF: Skilled nursing facility. The setting these clinical SOPs apply to.

PT: Physical therapy. Authorization tracked in `pt_approvals` table; status = 'pending' means awaiting prior auth, 'approved' means therapist may begin, 'denied' means request rejected.

OT: Occupational therapy. Authorized similarly to PT.

ST: Speech-language pathology / speech therapy.

DKA: Diabetic ketoacidosis. Acute hyperglycemic emergency. See insulin administration protocol section 6 (Hyperglycemia Management).

Hypoglycemia: Blood glucose below 70 mg/dL. Treated with the 'Rule of 15' from the insulin protocol.

MAR: Medication administration record. The chart entry recording each dose given.

Fall risk: Classified high / moderate / low per Morse Fall Scale. Tracked in the `residents.fall_risk` column; alerts logged in falls table.

ePHI: Electronic protected health information. Subject to HIPAA Security Rule safeguards. See NIST SP 800-66r2.

Rehab admission: Short-term rehabilitation stay in the SNF. Eligibility requires a 3-midnight hospital stay or documented skilled need (see rehab admission process).

Care plan: The interdisciplinary plan documenting goals, interventions, and review schedule. Reviewed at every team meeting.

Property Management Glossary

Lease: A signed rental agreement. Stored in the leases table with start_date, end_date, monthly_rent, security_deposit, and status ('active', 'expiring', 'pending', 'terminated').

Late fee: Charge for rent received after the 5th of the month. Per the tenant handbook, 5% of monthly rent. Recorded in payments.late_fee.

Security deposit: Refundable deposit. One month's rent for leases of 12 months or less; two months' rent for longer leases. Stored in leases.security_deposit.

Renewal notice: The notice the landlord must issue 60 days before lease end; the tenant must give written intent-to-vacate notice 30 days before end.

Pet deposit: \$300 per pet, non-refundable. Required when a lease's pets_allowed flag is 1.

Eviction: Legal process to remove a tenant for breach. Governed by state landlord-tenant law (see ohio-landlord-tenant-handbook for Ohio properties).

Pro-rated rent: Partial-month rent due when move-in or move-out doesn't align with the monthly cycle. Calculated as $(\text{monthly_rent} / 30) * \text{days_occupied}$.

Month-to-month: A lease that has expired without a renewal but the tenant remains. The tenant handbook applies a 10% rent premium when this happens without prior notice.
